VACUUM AND CHARGING STATIONS

The WIGAM bi-gas vacuum and charging trolley stations allow to operate in two separate cooling system with either R12, R22, R502, or R134a, R404A, R407C, R507 refrigerants.

Each unit consists mainly of:

- Two 2 kg charging cylinder
- Two 4-way manifolds with Ø80mm "Pulse free" pressure gauge
- One Ø80 mm vacuum gauge to control the vacuum level
- One high vacuum pump, which can be chosen among the many models available
- Two flexible hoses with 1/4" SAE connections and ball valve
- Two flexible hoses with 3/8" SAE connections and quick couplers
